Run AppleScript

```
on run {input, parameters}
    repeat with OMG from 1 to (count input)
        -- select System Snapshot
        -- set chosenFile to POSIX path of (choose file default location POSIX
        -- file "/Users/JC/Library/Logs/Discipline/Log/System_Snapshots/")
        set chosenFile to POSIX path of (item OMG of input)

        if (count every character of chosenFile) is not equal to 130 then
            display dialog "Um. Please choose a System Snapshot file that is in
                the folder it should be in..." buttons {"OK"} default button 1
            return
        end if
    end repeat
end run
```
